DETAILED ACTION

Inventorship

1. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1-45 are rejected under 35 U.S.C. 102(b) as being anticipated by zur Loye et al (US 6,230,683 B1).

Regarding claim 1, the reference of zur Loye et al discloses the premixed charge compression ignition engine with optimal combustion control including the following subject matters: an electronic control unit (20) for a multiple fuel engine utilizing a first fuel and a second fuel (col. 5, lines 57-61; and col. 13, lines 48-61), the electronic control unit (20) comprising:

Art Unit: 3747

means for inputting operating characteristics of an engine system to the electronic control unit (20), wherein at least one of the operating characteristics comprises gas pressure of the second fuel (col. 15, line 43 through col. 16, line 49), boost pressure of an intake manifold (col. 13, lines 8-16), or engine coolant temperature (col. 18, lines 10-54); and

means for controlling amounts of the first fuel and the second fuel for delivery to the multiple fuel engine based on at least one of the operating characteristics (as above discussions and see Figs. 17-22).

Regarding claims 2-20, as discussed in claim 1.

Regarding claims 21-27, as discussed in the rejection of the electronic control unit of claims 1-20.

Regarding claims 28-43, as above rejections.

Regarding claims 44-45, as discussed in claim 1, the ECU (20) that includes a central processing unit such as micro-controller, microprocessor, or other suitable micro-computing unit that can be the computer readable medium.
